

NEWS FOR FARRIERS

FPD Exclusive Distributor of Hoofjack® Products in U.S. and Canada

Kerckhaert recently acquired the Hoofjack brand and FPD will be the distributor of all Hoofjack products in the U.S. and Canada. Find FPD dealers carrying Hoofjack hoofstands at farrierproducts.com/locations.

Base available in (3) sizes; Standard, Medium and Mini. Posts and Cradles available in (4) sizes; Draft, Standard, Medium and Mini.

hoofjack®

BENEFITS OF HOOFJACK HOOF STANDS

- Allows the horse to stand in an anatomically correct and comfortable position
- Supports the hoof for daily care, treatment, bandaging and more
- Eliminates the need to put the hoof between your knees or support the horse's weight with your body
- Apply and remove studs with ease
- The solution for the leaning horse – let the horse lean on the stand and not on you
- Accommodates older horses with a limited range of motion

Hoofcast Now Available at FPD Dealers

Hoofcast, developed by Derek Poupard, a top Race Horse Farrier in the UK, is a hoof stabilizing product that is put on dry and sets when moisture is applied. Hoofcast is available in 2" and 3" rolls. Watch videos of Hoofcast in action at youtube.com/FarrierProducts/playlists.

FPD 21 for '21 Facebook Giveaway

THE FEBRUARY 2021 FACEBOOK GIVEAWAY WILL BE ONE PAIR EACH OF KERCKHAERT SX-10 UNCLIPPED FRONT AND HIND SHOES (SIZE 1).

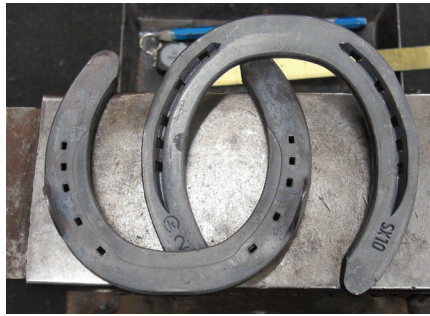

Follow FPD on Facebook @farrierproductdistribution to see what we're offering in the current month and look for posts like this one to register for a chance to win the monthly free give-away. This giveaway is only valid in the U.S. and Canada.

The Benefits of Using Kerckhaert SX-10 Shoes

The newest options in the Kerckhaert's SX Series are the SX-10 Clipped and Unclipped front and hind pattern shoes. For anyone looking for a good base of support and enough material to make helpful modifications, these shoes may be the answer. Designed for the U.S. and Canadian market, the shoes have well placed punching for City, Slim or Combo nails. They also have shapes that suit many of the breeds you work on with minimal amount of extra work. Have a look at these images and think about the benefits of good shape, excellent quality steel and material enough to do what you want to do to keep your horses sound and protected.

Example of a modification in the heels to enhance the cleanout. Liberty Cu Combo nails fit well in the V crease.

SX-10 fronts have sole relief built-in and the thickness of the shoe allows you to add even more if needed. Clipped fronts have solid clips between the second and third nail hole.

Full toe and good width in the heels complement the excellent front shape. V crease will accommodate a variety of nails including City, Slim or Combo heads.

If you need some protection for a sore heel or corn, you benefit from having enough steel to get that modification done (onion heel).

If you prefer toe clips, the unclipped SX-10 allows you to create a good solid clip without weakening the shoe.

Kerckhaert's hind patterns generally need very little shaping to get ready for nailing. Note the built-in full toe width on all the SX-10's (front and hind).

The extra thickness of the SX-10 provides more mechanics when you are rolling a toe.

The SX-10 hind shape makes an extended fit easier with an appropriate nail pattern.

Use your skills to modify where you need, without sacrificing strength of the shoe.

With just a little bit of grinding or hammer forging, boxing and bevels can be added where you need it, without sacrificing support.

Add lateral support (front or hind) when working with SX-10 shoes.

Get even more support by fulling the heel if needed.
