

**This versatile tape
makes a very good tool
handle wrap.**

- Very high tensile strength
(stretches up to 300%)
- High heat resistance (will not
melt up to 500°F)
- Resists UV rays and weathering
- Remains flexible down to -60°F

FootProTM
TOOL WRAP
10 Foot Roll

10 Foot Roll
MADE IN THE USA

APPLICATION

1. Clean the surface to be wrapped
2. Cut tape to desired length
3. Keeping tape clean and dry, peel back a short length of the protective film
4. Begin wrap with one complete overlap on itself
5. Stretch tape while wrapping object with half laps, removing protective film as you go
6. End final wrap with tape completely positioned onto itself. Tape will fuse onto itself after 2 minutes.

ADDITIONAL USES

- Temporary repair of radiator hoses
- Plumbing, hose repair, electrical connections up to 8000 volts
