ABOUT THE CLINICIAN

DEREK POUPARD CJF, DIPWCF

Derek began his career in 1983 as a farrier in South Africa, plating race horses. During this time, he was honored to plate the winner of the July Handicap, South Africa's premier race. In 1996, he was persuaded to move to the U.S. by Dr. Steve O'Grady. After achieving his CJF, he worked in the show jumping/hunter world for six years until his U.S. visa expired. Returning to South

Africa, Derek was offered a contract in Dubai, shoeing endurance horses. After one season, he moved to Zabeel racing stables. During this period, he developed Quixshoe (now Formahoof) to help rehabilitate horses with compromised feet. After five years working for Dubai Racing Club, Derek was promoted to Godolphin, the premier racing stables of Sheikh Mohammed bin Rashid Al Maktoum. Working between the U.K. and Dubai for the Winter Carnival, he shod more than 30 Grade 1 race winners, including the Dubai World Cup. While relocating horses back and forth between the U.K. and Dubai, he developed a system of training horses barefoot in the desert of Dubai. In doing so, he formulated his own brand of HoofCast (lighter and stronger) to facilitate a barefoot transition; helping compromised feet in shod horses. Due to the high success in the rehabilitation of race horses by removing shoes – and the dramatic improvement in the strength and integrity of the feet, Derek began the 3D design and printing of the range of 3D HoofCare pads available on the market today. The fundamental use of the pads is intended to emulate barefoot function, while still applying shoes. The overwhelming success of these pad applications led to Godolphin being crowned Champion of the U.K. and Dubai Carnival in 2021. Derek has since relocated to Sarasota, Florida, while still traveling to Dubai for the winter racing carnival.

DETAILS

APRIL 23, 2022

Featured Products

HOOFCAST

Used for the treatment of hoof problems (structural wall and sole failure). Adds temporary wear protection and support to the whole hoof capsule. Casting provides added support to help grow stronger, healthier hoof walls and soles.

3D HOOF PADS

Revolutionary new pads designed to treat problems in the heel area. Pad styles include Eclipse, Half Mesh, Half Mesh Degree, 3D Full Mesh.

BELLOTA TOP LEVEL RASP

Slightly thinner and about 12% wider (approximately 2") than traditional Bellota styles. The 8 tooth rasp side pattern has an aggressive cut and an intermediate file side.

FOOTPRO DIM

Non-toxic, non-allergenic, moldable two-part dental grade silicone. Use with a pad to provide either a soft cushion (DIM20), or a firm supportive material (DIM40).
