ABOUT THE CLINICIAN MIKE CHANCE, APF CJF

Mike is living in Tioga, TX and has been shoeing full time since 1985. He has always been active in participating and promoting educational opportunities. He has served as President of the Oklahoma Farriers Association as well as serving on the Board of the AFA. He continues to work with the AFA certification program to help farriers working to improve their skills. And Mike is the current TPFA President.

While Mike's work is now divided between Cutting, Western Pleasure and halter horses, over the years he has worked in many other disciplines, as well. His presentation focuses on a common sense approach to everyday work and maintaining soundness in performance horses.

CLINIC DAY SPECIAL

GRAND REOPENING OF THE STORE

MFC Products are 15% off on the day of clinic (April 29, 2023).

Featured Products

FOOTPRO™ DIM IMPRESSION MATERIAL

A non-toxic, non-allergenic, dental grade silicone that is hand mixed to a moldable consistency and applied to the bottom of the equine foot with a pad to provide either a soft cushion (DIM20), or a firm supportive material (DIM40).

BELLOTA RASPS

Guaranteed consistency, and varying combinations of rasp and file coarseness, length and width options. Tests have shown that Bellota outperforms the competition and delivers better cutting performance, consistency and durability over time.

LIBERTY NAILS

Designed with precise specifications, optimum clinching, accurate bevels and points to provide consistent driving and outstanding results. In addition to all of these features, Liberty Cu Nails include Copper (Cu) Shield Technology. This technology provides more protection.

KERCKHAERT STANDARD MAX

The Kerckhaert Standard Max is the answer to increased demand from farriers for a basic shoe with additional thickness. The Standard Max complements the Standard and Standard Extra. Slightly wider than the Standard, but in a 3/8" thickness, the Standard Max is produced on the same system as the Standard and Extra in order to provide a full toe, nicely balanced for the width of stock.
