ABOUT THE CLINICIAN

ROY BLOOM, CJF APF-I

Roy Bloom CJF APF has been shoeing horses since 1973. He has been a member of the American Farrier's Team on two different occasions and for many years served as the manager of the team.

Roy has always been willing to share the extensive knowledge he's gained over the years with members of the farrier industry. In addition to his farrier background, he developed a strong interest in blacksmithing and tool making and for many years has been manufacturing a broad range of farrier and blacksmith tools. He also has a fully equipped shop and the ability to do a wide variety of ornamental and artistic work.

Roy's work as a clinician has earned him the Educator of the Year Award from the AFA and a position in the Horseshoer's Hall of Fame.

BLOOM FORGE TOOLS

Roy Bloom has a reputation for the greatest attention to detail and maximum performance for every product he manufactures. With over 40 years experience as a farrier, Roy understands the use of the tools. He has perfected his forging skills as a blacksmith and brings an unique understanding of the materials and stresses they endure.

Featured Products

BELLOTA RASPS

Guaranteed consistency, and varying combinations of rasp and file coarseness, length and width options. Tests have shown that Bellota outperforms the competition and delivers better cutting performance, consistency and durability over time.

FOOTPRO™ DIM IMPRESSION MATERIAL

A non-toxic, non-allergenic, dental grade silicone that is hand mixed to a moldable consistency and applied to the bottom of the equine foot with a pad to provide either a soft cushion (DIM20), or a firm supportive material (DIM40).

PLEXUS CAUDAL SUPPORT PADS

Made in the U.S., Austin Edens' Plexus Pads feature a patent pending, common sense design and are designed to fit both fronts and hinds. The unique diamond-shaped holes provide a greater locking strength. The extra length and width at the toe and heel accommodates any shaped foot and modifications. The pads include a large frog plate, with heel check relief. The frog plate stabilizers keep its tip anchored in place - even in the harshest conditions. The wedge pad features a three-degree wedge for help in correcting negative palmar angles and tendon issues, while maintaining caudal support.
