ABOUT THE CLINICIAN WITH HENRY DETWEILER, CJF

Henry Detweiler, CJF of Vermontville, Michigan, has been shoeing since he was 16 years old. In 1988, Henry became a full-time farrier. For 35 years, he has shod all breeds, six days a week – four days on the road and two days in the shop.

Henry joined the American Farrier's Association (AFA) and Michigan Horseshoers Association (MHA) in 1990. In 1992, Henry passed the AFA Certified Farrier exams, and in 2006, he passed the AFA Certified Journeyman Farrier exams.

In 2019, Henry was awarded the AFA's Edward Martin Humanitarian Award, which is awarded to a farrier who shows an active effort in promoting goodwill within the profession. Henry was able to meet Edward Martin at his first AFA Convention in Little Rock, Arkansas, 33 years ago.

Henry hosts the AFA Certification once a year in September for the MHA. He feels blessed to continue his career, while meeting and helping fellow farriers.

KERCKHAERT SX-8 SERIES
The SX-8 is a 5/16" thick shoe with graduated widths. These shoes are used for trail, jumping, dressage and ranch work. Shoes are symmetrical. Sole relief on fronts. Punched for 5 City, 5 Slim or 5 Combo. Also available from the SX-8 Series: SX-8 Select Hind and SX-8 Bold.

Featured Products

KERCKHAERT SX-10 SERIES
The SX-10 is the first 10mm Kerckhaert shoe in a front and hind pattern punched for City and Combo Slim nails. This shoe features a full, balanced toe, extra thickness, graduated widths and a 10 nail hole pattern. Excellent choice for additional strength, wear, nailing and modification options.

FOOTPRO™ DIM
FootPro™ DIM Impression Material is a non-toxic, non-allergenic, dental grade silicone that is hand mixed to a moldable consistency and applied to the bottom of the equine foot with a pad to provide either a soft cushion (DIM20), or a firm supportive material (DIM40) when needed.

PLEXUS PERFORMANCE PADS

Made in the U.S., Austin Edens' Plexus Pads feature a patent pending, common sense design. The shape and design of Plexus Open Toe Caudal Support pads allow for easy fit on front or hind for more hoof sizes; reducing the need for more inventory. The frog plate is tapered for heel fit, reducing the need for trimming or grinding pads or heels of shoes. The open toe design minimizes trapping of foreign materials in the front half of the foot. High quality injection molded material allows for resets. Available in Flat and Degree. The Full Plexus pads are a hybrid design, size S-M, to minimize the number of sizes you need to carry. The one size will easily fit shoe sizes 00 through 3. High quality injection molded material allows for resets. Available in Flat and Degree.
